OUR PRODUCTS

PRE-POST Protein Fibra Post

- Helps prepare the tissues for the liposuction process, resulting in a faster recovery.
- Aids in the production of red blood cells, which helps increase hemoglobin levels for your surgery.

Thanks to its content of Omega-3 and Omega-6, it helps reduce post-operative inflammation, creating a more favorable environment for the transferred fat to integrate and survive in its new location.

- Helps with proper digestion and nutrient absorption.
- Aids in eliminating fat from the abdominal and visceral areas.
- Helps prevent abdominal bloating throughout the day.
- Supports the immune system.
- Helps lower cholesterol levels.
